As I am sure you are aware, NIK Software was bought up by Google a couple of years back and is now being given away free by them. The downside is that Google have announced that there will be no further development to the software.

This suite of programs is much used by many photographers and a petition has been started to try to persuade Google to continue to develop the software or to allow other developers to continue to update it.

The petition now stands at over 14,000 names, but more are needed before it is submitted.

Information about this petition, and how to sign up to it, can be found at

From 2007. A great print by a great printer.

A Splash of Yellow by Irene Froy MPAGB

An occasional series of innovative work in its time, which is still good today. Let us see your recent work in the masters of print.

EVERYONE HAS A CHANCE IF THEY SEND THEIR BEST PRINTS

PAGB Gold and Silver Medals will be awarded by our judges but most of the prize winners will be chosen by the Sponsors, who have donated the fabulous prizes and at least one will be voted for by those who attend the exhibition in London.

The judges and selectors will be at pains to ensure variety, diversity and as much new work as possible – prints which have not yet been widely exhibited already. Of course, we haven't completely banned your "back catalogue" and the familiar names may well be successful but they can only have one print accepted into the exhibition and can only win one prize, so **EVERYONE** has a chance. That means **YOU!** Read all about it and download a copy of the rules and timetable at <http://www.thepagb.org.uk/competitions/pagb-masters-of-print/>

and finally...

Every time we distribute **e-news** we get lots of "bounces". The majority are "soft" bounces, the most common being DNS failure. "Soft" bounces remain on our circulation list for future issues but will not receive the current issue. You can check at www.pagbnews.co.uk, if you think you have missed an issue of **e-news**.

DON'T MISS OUT – CHECK THE e-news ARCHIVE

DNS failure

The recipient's email server is currently unable to deliver your email due to DNS issues on their end. This may or may not be a temporary problem. The error could be due to the mail server being down, or there was a typo when it was set up, or maybe the destination domain doesn't exist.

All we know is that the DNS host is unreachable, therefore we treat this as a soft bounce to allow some time for the problem to be rectified.

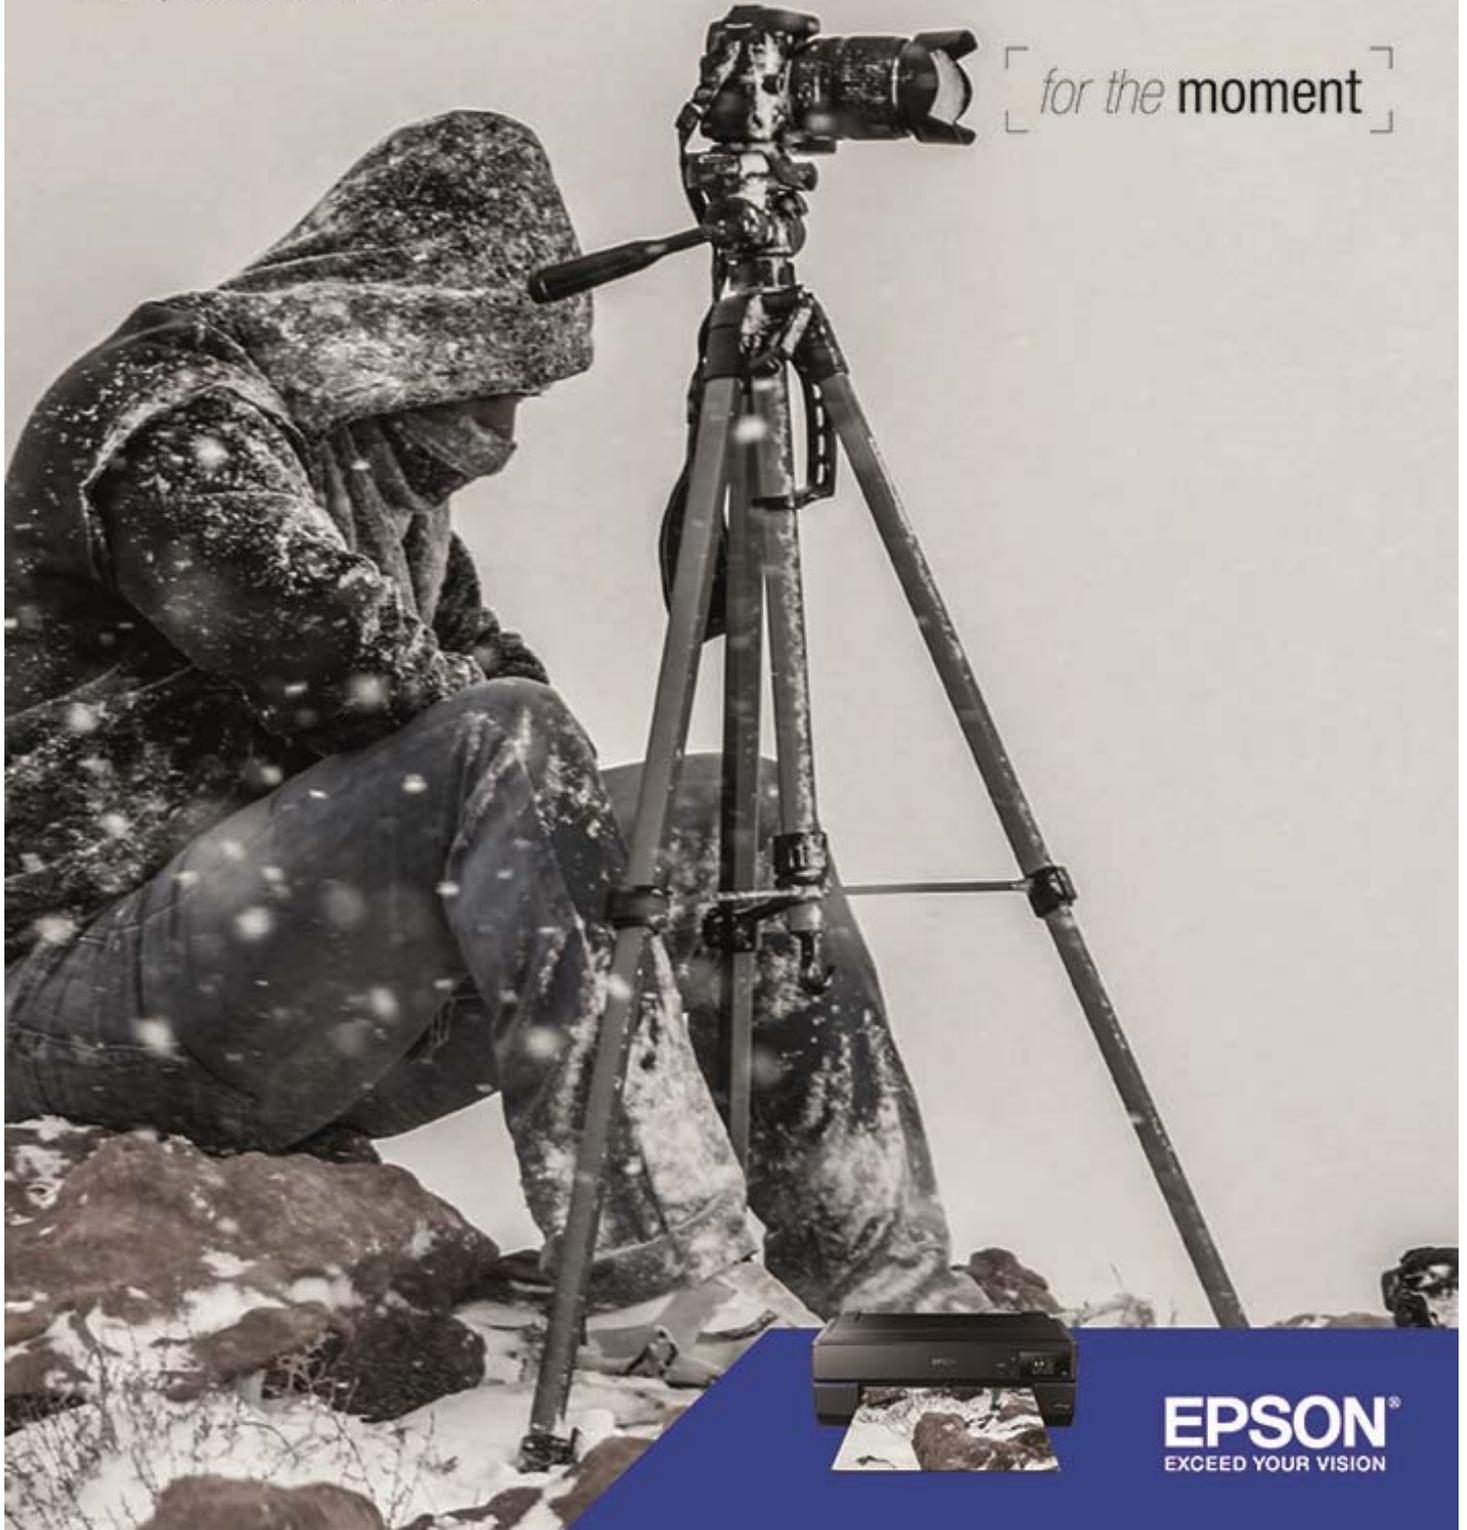

For the relentless

Nothing can stop me. Not 60mph winds. Not -20°C temperatures. Mother Nature, give me everything you've got. All I'm focused on is getting the perfect shot, no matter what it takes, or where it takes me. It'll be worth it. To do the image justice – I have to print Epson.
